

MAGNET S2

WEEKLY OSINT INTELLIGENCE SNAPSHOT

DTG: 260628-1200Z | Reporting Period: 21–28 June 2026 | United States Focus | www.magnethf.com

MAGCON STATUS

**MAGCON
LEVEL 3
ELEVATED**

MAGCON HOLDS AT LEVEL 3 – ELEVATED. TRENDING WORSENING. The MOU signed 18 June 2026 is under severe operational stress. This week saw the most significant post-MOU escalation: Iranian one-way attack drones struck Singapore-flagged M/V Ever Lovely (June 25) and Panama-flagged M/T Kiku (June 27) in the Strait of Hormuz. US CENTCOM launched retaliatory strikes on Iranian military infrastructure on June 26 and June 27 — the first US strikes on Iran since the MOU was signed. Iran then launched drone and missile attacks on Bahrain and Kuwait (June 27–28). Trump threatened Iran's non-existence on Truth Social. Iran's IRGC threatened a complete halt to diplomatic processes. Despite this, CENTCOM reports commercial vessel transits through Hormuz continue under US escort, and JMIC widened a transit lane near Oman on June 27. A new US–Israel–Lebanon framework agreement was signed by Rubio on June 26 in Washington — but Hezbollah called it "null and void," rejected it, and protests erupted in Beirut. **NEW KEV CRITICAL DEADLINES TODAY:** Cisco UCM CVE-2026-20230 (CVSS 8.6, SSRF-to-root) and PTC Windchill/FlexPLM CVE-2026-12569 (deserialization RCE, manufacturing/defense sector) — both BOD 26-04 deadlines are June 28. **PASSED:** Ubiquiti UniFi OS (3 × CVSS 10.0) and Lantronix EDS5000 — deadlines passed June 26. Delaney Hall ongoing: 37+ day hunger/labor strike; Father's Day vigil disrupted by vehicle strike June 22. FIFA World Cup enters Week 3; Round of 16 complete; July 4th convergence window approaching. **TREND VS LAST WEEK: WORSENING — MOU UNDER FIRE / US–IRAN EXCHANGE OF STRIKES / BAHRAIN AND KUWAIT TARGETED / DUAL KEV DEADLINE TODAY / HORMUZ TRANSIT CONTESTED / LEBANON FRAMEWORK DISPUTED BY HEZBOLLAH**

PRIMARY RISK DRIVERS

- **NEW — CRITICAL ESCALATION — US–Iran Exchange of Strikes in Hormuz (June 25–27):** Iranian one-way attack drones struck M/V Ever Lovely (Singapore-flagged, June 25, near Oman coast) and M/T Kiku (Panama-flagged, June 27, Hormuz, bridge damage, crew safe, QatarEnergy oil cargo). CENTCOM launched retaliatory strikes on Iranian military targets both days: missile/drone storage, radar sites, Qeshm Island, air defense infrastructure, drone storage, minelaying capabilities. Iran's IRGC then struck Bahrain (June 27, hosts US NSA Bahrain base) and claimed attacks on Kuwait-area US-linked targets (June 27–28). Trump: "Islamic Republic of Iran will no longer exist" if violations continue. Iran's IRGC: attacks would result in "complete halt of all diplomatic processes." CENTCOM: commercial transits continue; US forces "vigilant, lethal, ready."
- **Israel–Lebanon Framework Agreement SIGNED (June 26, Washington):** US Secretary of State Rubio signed trilateral framework agreement with Israeli Ambassador Leiter and Lebanese Ambassador Hamadeh on June 26. Agreement calls for ceasefire contingent on complete cessation of Hezbollah operations, withdrawal of Hezbollah operatives from southern Lebanon, and Lebanese army assumption of sovereign control. Critically: does NOT mandate Israeli military withdrawal from occupied southern Lebanese territory — withdrawal tied to Hezbollah disarmament. Hezbollah leader Naim Qassem called deal "null and void" and rejected it. Hezbollah supporters blocked Beirut airport road with burning tires in protest. Israeli DM Katz: IDF retains "full freedom of action." Fighting continued June 27–28. An Israeli drone struck Nabatieh al-Fawqa, June 27 — day after signing.
- **US–Iran Hormuz Communications Line Established (June 26):** Iran's state-backed Press TV reported June 26 that Iran and the US established a communications line to prevent further military incidents in Hormuz — hours after Iran struck the Ever Lovely. Talks in Switzerland and Islamabad produced a roadmap and de-confliction cell for Lebanon (June 21–23), but the June 25–27 exchange of strikes puts that framework in jeopardy as of DTG.
- **JMIC Widened Hormuz Transit Route (June 27):** US Navy Joint Maritime Information Center announced a widened route through the Strait of Hormuz near Oman on June 27 — a direct challenge to Iran's claim of sole authority over designated shipping lanes. Iran insists all vessels must use the Iran-designated route near the Iranian coastline. Oman established two IMO-coordinated temporary lanes, which Iran has rejected. Route authority dispute is the active flashpoint for commercial maritime operations.
- **NEW KEV — Cisco UCM CVE-2026-20230 — DEADLINE TODAY (June 28):** CISA added June 25 under BOD 26-04. SSRF vulnerability in Cisco Unified Communications Manager (Unified CM) and Unified CM Session Management Edition. Unauthenticated file write to OS via WebDialer service → attacker escalates to root. CVSS 8.6; Cisco rated CRITICAL due to root escalation path. Active exploitation confirmed by Defused (week of June 21). Patch

available since June 3. BOD 26-04 federal deadline: TODAY June 28. Apply cisco-sa-cucm-ssrf-cXPnHcW. WebDialer must be enabled to exploit — disable if not needed.

- **NEW KEV — PTC Windchill/FlexPLM CVE-2026-12569 — DEADLINE TODAY (June 28):** CISA added June 25 under BOD 26-04. Deserialization of untrusted data → unauthenticated RCE in PTC Windchill PDMLink and PTC FlexPLM — industrial product lifecycle management (PLM) software used in manufacturing, aerospace, automotive, and defense. All versions through 11.0 affected; branches 11.1, 11.2, 12.0, 12.1, 13.0 also affected. BOD 26-04 deadline: TODAY June 28. Apply PTC advisory CS473270 immediately.
- **PASSED — Ubiquiti UniFi OS × 3 CVE-2026-34908/34909/34910 (CVSS 10.0) + Lantronix EDS5000 CVE-2025-67038 (deadline June 26):** Four BOD 26-04 deadlines passed June 26: three Ubiquiti UniFi OS vulnerabilities (command injection CVSS 10.0, improper access control, path traversal — all CVSS 10.0). Active exploitation confirmed by CISA and NCSC Netherlands. Lantronix EDS5000 deadline also passed June 26. Any organization that has not patched: treat affected environments as compromised, rotate credentials, audit logs immediately.
- **GCC Statement — Iran Deal Must Address Missile Capability (June 26):** Gulf Cooperation Council foreign ministers released a statement demanding that any final US–Iran deal must include limiting Iran's ballistic missile capability — a topic not addressed in the current 14-point MOU. This is an external pressure point on the 60-day negotiating window and signals regional expectations beyond the MOU framework.
- **US Senate War Powers Resolution Passed:** The US Senate passed a war powers resolution rebuking Trump's authority over the Iran conflict — the first time the Senate has successfully passed such a resolution during the current crisis. Signifies growing congressional scrutiny of executive military authority as exchange of strikes resumes.
- **FIFA World Cup Week 3 / July 4th Window Approaching:** Tournament enters Week 3 (Round of 16 concluded). Flashpoint (June 22) updated threat landscape: "dynamic" environment spanning physical security, civil unrest, cyber threats, and geopolitical developments. Iran-themed protest activity active at host cities alongside broader World Cup demonstrations. No confirmed major security incidents at venues as of DTG. July 4th weekend (July 3–5): Quarterfinals in Dallas, KC, Houston, Philadelphia, NYC — maximum threat convergence with US 250th anniversary remains highest-risk window.
- **Delaney Hall — 37+ Days / Father's Day Vigil Disrupted (June 22):** Hunger and labor strike at Delaney Hall continues beyond 37 days. June 22: Father's Day vigil outside Delaney Hall disrupted when a vehicle (reportedly GEO Group employee) struck a female protester; ICE then deployed pepper spray and mace on the crowd. NJ Gov. Sherrill's June 9 inspection was closely controlled; she was prohibited from speaking with any detained persons. Separately: a Georgian national (Mamuka Artmeladze) died at Winn Correctional Center LA — the 50th death in ICE custody since Trump took office. GAO report on Camp East Montana (Fort Bliss) found "significant, pervasive issues" with treatment of detained people.
- **Section 702 — STILL LAPSED:** FISA Section 702 authority lapsed June 12. No emergency legislative session confirmed. No executive order. Active domestic SIGINT gap continues through active military exchange of strikes and fragile MOU negotiations.

DELTA SUMMARY – CHANGES FROM LAST REPORT (260621-1200Z)

TOPIC	DELTA FROM 260621-1200Z	STATUS
Hormuz — US/Iran Exchange of Strikes (June 25–27)	CRITICAL NEW ESCALATION. Ever Lovely struck June 25; CENTCOM struck Iran June 26. Kiku struck June 27; CENTCOM struck Iran June 27 (10 targets). Iran struck Bahrain/Kuwait June 27–28. Trump threatened Iran non-existence. IRGC threatened halt to diplomacy. Commercial vessel transits continue under CENTCOM escort.	WORSENING / CRITICAL
JMIC Widened Hormuz Route (June 27)	NEW. US Navy JMIC announced widened Omani route — direct challenge to Iran's claim of sole route authority. Iran insists only its designated coastal route is valid. Oman's IMO-coordinated lanes also rejected by Iran.	NEW / ONGOING
Israel–Lebanon Framework Agreement (June 26)	NEW. Rubio signed trilateral framework in Washington with Israeli and Lebanese ambassadors. Hezbollah called deal "null and void" and rejected. Protests in Beirut. IDF retains "full freedom of action." Fighting continued June 27–28.	NEW / CONTESTED
Switzerland / Islamabad Talks — Roadmap Agreed	IMPROVING THEN UNCERTAIN. Roadmap toward 60-day deal agreed; de-confliction cell for Lebanon established; US–Iran communications line established June 26. June 25–27 exchange of strikes puts framework under severe	IMPROVING THEN WORSENING

	stress as of DTG.	
GCC Missile Demand / Senate War Powers Resolution	NEW. GCC declared any Iran deal must limit missile capability. US Senate passed war powers resolution rebuking Trump on Iran conflict — first successful passage during conflict.	NEW
IAEA Nuclear Inspection Dispute	ONGOING. US and Iran dispute whether Iran agreed to allow IAEA inspectors to view bombed nuclear sites. No confirmed IAEA access. Pezeshkian met Pakistani mediators June 23 in Islamabad.	ONGOING / UNRESOLVED
CVE-2026-20230 Cisco UCM (KEV — TODAY)	NEW — CISA added June 25. SSRF-to-root via WebDialer. Active exploitation confirmed. BOD 26-04 deadline TODAY June 28. Patch cisco-sa-cucm-ssrf-cXPnHcW immediately.	NEW / CRITICAL
CVE-2026-12569 PTC Windchill/FlexPLM (KEV — TODAY)	NEW — CISA added June 25. Deserialization RCE in industrial PLM. Affects manufacturing/defense/aerospace. BOD 26-04 deadline TODAY June 28. Apply PTC CS473270.	NEW / CRITICAL
Ubiquiti UniFi OS × 3 CVE-2026-34908/09/10 + Lantronix EDS5000 (Deadline PASSED June 26)	PASSED. Four BOD 26-04 deadlines expired June 26. Three CVSS 10.0 Ubiquiti vulns confirmed actively exploited. Lantronix EDS5000 also overdue. Treat unpatched as compromised.	PASSED / CRITICAL
Splunk CVE-2026-20253 (Deadline PASSED June 21)	ONGOING. Deadline passed June 21. Organizations that have not patched: assume exploitation. Rotate credentials, preserve logs, upgrade immediately.	PASSED / ONGOING
Fortinet "FortiBleed" — 70,000+ Firewalls Compromised	NEW INTELLIGENCE. 70,000+ Fortinet firewalls confirmed compromised per intelligence-monitoring sources (June 26). Not a formal CISA KEV. Patch immediately; run IOC check; rotate Fortinet VPN credentials.	NEW / HIGH
Delaney Hall — Father's Day Vigil Disrupted	ESCALATING. June 22: protester struck by vehicle (reportedly GEO Group employee); ICE deployed pepper spray. 50th ICE custody death under Trump. GAO Camp East Montana report: "significant, pervasive issues." Hunger/labor strike ongoing 37+ days.	ONGOING / ESCALATING
FIFA World Cup — Week 3 / July 4 Approaching	ONGOING / ELEVATED. Flashpoint June 22: threat environment "dynamic." Iran-themed protests at host cities. Round of 16 complete. July 4th convergence window (July 3–5) approaching — still the maximum threat window.	ONGOING
Section 702 Lapse	ONGOING — NO CHANGE. Still lapsed. No session, no executive order. SIGINT gap continues during active exchange of strikes.	ONGOING / NO CHANGE
Check Point CVE-2026-50751 Qilin ransomware	ONGOING — NO CHANGE. Qilin ransomware affiliate continues exploitation campaign. Run SmartConsole log search from 2026-05-07. Apply hotfix.	ONGOING
Microsoft Patch Tuesday CVEs	ONGOING — NO CHANGE. June 10 patches required for unpatched systems. RoguePlanet CVE-2026-47281, Kernel RCE CVE-2026-45657 still require application.	ONGOING
GKN Garden Grove / Converse Reservoir	ONGOING — NO CHANGE. No arrest, no contamination results, no suspect or motive.	NO CHANGE
Canvas LMS Breach	STABLE — NO CHANGE. Phishing risk continues through mid-August.	NO CHANGE

NO CHANGE

- MAGCON level holds at 3 – ELEVATED
- Iranian APT cyber targeting of US ICS/OT remains active
- Bab el-Mandeb / Red Sea threat stable at ELEVATED (Houthi posture unchanged; MOU does not address Houthi)
- Panama Canal – ROUTINE, stable
- CIRCIA mandatory cyber incident reporting rule finalization still pending
- CISA CI Fortify initiative ongoing
- Microsoft Exchange CVE-2026-42897 (XSS/OWA) — patch still required
- Canvas LMS breach phishing risk ongoing through mid-August
- GKN Aerospace Garden Grove criminal investigation — no new arrest or contamination results
- Converse Reservoir IED (Mobile, AL) — FBI investigation ongoing, no suspect or motive

SECTOR THREAT LEVELS

SECTOR	LEVEL	NOTES
Terrorism / Extremism	ELEVATED	FIFA World Cup Week 3 active across 11 US host cities. Flashpoint (June 22): threat environment "dynamic" spanning physical security, civil unrest, cyber threats, geopolitical developments. ISIS propaganda targeting venues remains active from prior week. Iran-themed protests at host cities add geopolitical dimension. July 4th weekend (July 3–5) remains maximum threat window — Quarterfinals in Dallas, KC, Houston, Philadelphia, NYC converging with US 250th anniversary.
Cyber Activity	ELEVATED	DEADLINE TODAY: Cisco UCM CVE-2026-20230 (SSRF-to-root, actively exploited); PTC Windchill/FlexPLM CVE-2026-12569 (deserialization RCE, manufacturing/defense). PASSED: Ubiquiti UniFi OS x 3 CVSS 10.0 + Lantronix EDS5000 (June 26). NEW INTELLIGENCE: 70,000+ Fortinet firewalls confirmed compromised. Splunk CVE-2026-20253 deadline passed June 21 — unpatched systems assumed compromised. Qilin ransomware (Check Point CVE-2026-50751) ongoing. cURL 18 vulns patched — update to 8.21.0.
Critical Infrastructure	ELEVATED	PTC Windchill/FlexPLM KEV affects manufacturing/aerospace/defense PLM infrastructure directly. Ubiquiti CVSS 10.0 deadlines passed — network management infrastructure at risk. Converse Reservoir IED (Mobile, AL) investigation ongoing — no arrest. GKN Garden Grove long-tail active. Section 702 lapse creates surveillance gap during active exchange of strikes.
Energy / Fuel Sector	CRITICAL	Hormuz severely contested. M/V Ever Lovely (June 25) and M/T Kiku (June 27) struck by Iranian drones. US and Iran exchanged strikes June 26–27. IRGC warned diplomacy may halt entirely. JMIC widened Omani route June 27 — Iran contested it immediately. Commercial transits continue but under active threat. BRENT price movements Monday open will reflect exchange-of-strikes assessment. 54+ supertankers remain in Gulf backlog.
Education Sector	ELEVATED	Canvas breach phishing risk continues through mid-August. No new developments this cycle.
Civil Unrest	ELEVATED	ESCALATING. Delaney Hall 37+ day hunger/labor strike. Father's Day vigil June 22: protester struck by vehicle; ICE deployed pepper spray and mace. 50th ICE custody death under Trump. GAO report: "significant, pervasive issues" at Camp East Montana. FIFA World Cup-related protests at host cities (Iran themes, immigration, housing). Iran-themed demonstrations active.
Transportation Systems	CRITICAL	Hormuz under active threat from Iranian drone attacks. M/V Ever Lovely and M/T Kiku struck. JMIC widened route June 27 challenged by Iran. IMO sailor evacuation temporarily paused after Ever Lovely attack. FIFA World Cup travel surge stressing transit in 11 US host cities. US–Oman route vs. Iran-designated

		route remains live operational question for commercial maritime.
Supply Chain / Logistics	ELEVATED	Hormuz drone attacks directly threaten commercial supply chain routing. PLM supply chain threat: PTC Windchill RCE (KEV June 28) directly targets manufacturing/defense supply chain management infrastructure. Developer supply chain: Splunk SIEM compromise risk ongoing. Ubiquiti network device deadlines passed. Supertanker backlog of 54+ vessels in Gulf.
Food / Fertilizer Security	ELEVATED	Gulf shipping disruption persists. MOU framework at risk from exchange of strikes. WFP food insecurity warning remains active. Fertilizer/agricultural trade lane disruption ongoing from Hormuz closure.
Mass Gatherings / Public Safety	HIGH	FIFA World Cup Week 3 active. Flashpoint updated threat report June 22. Iran-themed protests at host cities. Round of 16 complete; Quarterfinals July 3–5 in multiple US cities — maximum convergence with US 250th anniversary approaching. Bahrain and Kuwait Iranian drone attacks June 27–28 signal regional escalation that may affect threat picture for Iranian diaspora at US venues.

GLOBAL CHOKEPOINT WATCH

CHOKEPOINT	STATUS	ASSESSMENT
Strait of Hormuz	CRITICAL	M/V Ever Lovely struck June 25; M/T Kiku struck June 27. CENTCOM struck Iran June 26 and June 27. Iran struck Bahrain/Kuwait June 27–28. JMIC widened Omani route June 27 — Iran rejected it. Commercial transits continue under CENTCOM escort. DO NOT route independently without TRANSCOM coordination. Mine clearance ongoing. Iran insists its coastal route is the only authorized lane. Verify routing with TRANSCOM before transit.
Bab el-Mandeb / Red Sea	ELEVATED	Stable. Houthi threat posture unchanged. MOU does not address Houthi or Red Sea threat. No significant new incidents this cycle.
Panama Canal	ROUTINE	Stable. Normal operations.
Strait of Malacca	ELEVATED	SE Asia energy stress from Hormuz closure persists. Regional reactions to exchange of strikes being monitored. Stable but watching for escalation.
Bahrain — NSA Bahrain (US Base)	HIGH	NEW. Iran's IRGC struck Bahrain on June 27 with multiple drones — first direct Iranian strike on a US base host nation since MOU signing. Bahrain condemned attack as violation of sovereignty. US reported no assets hit. Monitor for follow-on incidents.
Kuwait — Al Jaber/Ali Al Salem Air Bases	ELEVATED	NEW. Iran claimed attacks on "US-linked targets" in Kuwait June 27–28. Severity of strikes unconfirmed. Monitor for follow-on incidents.

KEY INCIDENTS

US–IRAN EXCHANGE OF STRIKES IN STRAIT OF HORMUZ (JUNE 25–27, 2026)

The most significant post-MOU military escalation occurred June 25–27 when Iran launched one-way attack drones at commercial vessels in the Strait of Hormuz, triggering US retaliatory strikes on Iranian military infrastructure for the first time since the MOU was signed on June 18.

June 25: A suspected Iranian drone struck the Singapore-flagged M/V Ever Lovely while the vessel was exiting the Strait along the Omani coast. The ship sustained damage but was able to continue. Trump posted to Truth Social: "Obviously, this is a foolish violation of our Ceasefire Agreement."

June 26: CENTCOM launched strikes on Iranian missile and drone storage locations and coastal radar sites in response to the Ever Lovely attack. CENTCOM characterized the strikes as a "powerful response" to Iran's "dangerous behavior." CENTCOM stated Iran was then "given a chance to honor the ceasefire agreement but elected not to."

June 27: Iran launched a one-way attack drone that struck the Panama-flagged oil tanker M/T Kiku — carrying crude oil for Qatar's state-run QatarEnergy — at 4:30 a.m. ET. The vessel sustained damage to its bridge; all crew reported safe. CENTCOM then struck 10 Iranian military targets: surveillance infrastructure, communication systems, air defense sites, drone storage facilities, and minelayer capabilities. UKMTO raised its Hormuz threat level from Moderate to Substantial.

June 27–28: Iran's IRGC struck Bahrain with multiple drones (Bahrain hosts NSA Bahrain, a major US Navy facility). Iran also claimed attacks on US-linked targets in Kuwait. Bahrain's Foreign Ministry condemned the attacks as "blatant violation of its sovereignty." US reported no assets hit. Iran accused the US of a "clear violation" of the MOU. Iran's IRGC warned attacks would result in "complete halt of all diplomatic processes."

As of DTG June 28: CENTCOM states commercial vessel transits through Hormuz continue; US forces "vigilant, lethal, ready." Iran FM Araghchi warned any routing outside Iran-designated lanes "will only lead to more complications and delays." The MOU remains nominally in effect but is under severe strain. Monitor for any Iranian formal announcement of MOU suspension.

ISRAEL–LEBANON FRAMEWORK AGREEMENT SIGNED — HEZBOLLAH REJECTS (JUNE 26, 2026)

US Secretary of State Marco Rubio announced on June 26 that Israel and Lebanon had reached a new framework agreement, signed in Washington by Israeli Ambassador Leiter and Lebanese Ambassador Hamadeh with State Department Chief of Staff Daniel Holler. Secretary Rubio called it a significant step toward "lasting peace and security."

The framework calls for: a ceasefire contingent on complete cessation of Hezbollah operations; withdrawal of Hezbollah operatives from southern Lebanon; assumption of sovereign control by the Lebanese Armed Forces. Critically, the deal does NOT mandate Israeli military withdrawal from the approximately 20% of Lebanese territory currently occupied by the IDF — withdrawal is instead tied to Hezbollah disarmament, a condition Hezbollah has repeatedly rejected.

Hezbollah leader Naim Qassem called the deal "null and void" on June 26. Hezbollah supporters blocked the Beirut airport road with burning tires and demonstrated near parliament. Israeli Defense Minister Katz confirmed IDF retains "full freedom of action" to operate in Lebanon. Lebanese President Aoun called Trump on June 27 urging Washington to press Israel to honor withdrawal commitments.

Fighting continued: An Israeli drone struck the Nabatieh al-Fawqa area on June 27 — the day after signing. Hezbollah killed an Israeli soldier in Deir Siryan on June 28. Hezbollah's new leader stated the group would fight on until Israel withdraws from southern Lebanon.

Assessment: The framework agreement gives Netanyahu a partial diplomatic win — allowing IDF to remain in southern Lebanon — while the Hezbollah rejection means the Lebanon variable that has repeatedly blocked the broader US–Iran MOU implementation remains active. The MOU Clause 1 linkage (full termination of operations on all fronts including Lebanon) is not resolved.

DELANEY HALL — FATHER'S DAY VIGIL DISRUPTED / 50TH ICE CUSTODY DEATH (JUNE 22, 2026)

The hunger and labor strike inside Delaney Hall ICE detention facility in Newark, NJ has exceeded 37 continuous days (begun May 22). On June 22, a Father's Day vigil held outside Delaney Hall was disrupted when a red vehicle reportedly operated by a GEO Group employee struck a female protester who was waving an upside-down US flag near the facility entrance. ICE agents then deployed pepper spray and mace on the crowd. Demonstrators filmed the incident and posted widely on social media.

In a separate development, Georgian national Mamuka Artmeladze, 43, died at Winn Correctional Center in Louisiana — marking the 50th death in ICE custody since Trump took office. The facility has a documented pattern of issues and had a prior ICE custody death within two months.

NJ Governor Sherrill's inspection of Delaney Hall on June 9 was closely controlled; she was prohibited from speaking with any detained persons. The GAO released a report on Camp East Montana (Fort Bliss, El Paso), the largest ICE detention facility in the US, finding "significant, pervasive issues" with treatment including failure to perform health assessments, a lost loaded firearm, medical neglect, and violent abuse.

Assessment: This situation continues to accumulate legal, political, humanitarian, and public safety dimensions. Legal proceedings against GEO Group remain active. MAGNET operators: avoid Doremus Ave vicinity Newark during protest windows; monitor for spread to other ICE facilities in NJ, NY, and adjacent states.

FIFA WORLD CUP 2026 — WEEK 3 / JULY 4 CONVERGENCE WINDOW APPROACHING

The 2026 FIFA World Cup enters Week 3 as of DTG, with Round of 16 matches concluded and Quarterfinals beginning July 3. Flashpoint published an updated threat landscape assessment on June 22 characterizing the environment as "dynamic," spanning physical security, civil unrest, cyber threats, and geopolitical developments.

Protest activity in host cities has expanded: demonstrations related to Iran-themed geopolitical tensions, immigration enforcement, housing advocacy, and anti-FIFA sentiment have occurred at multiple host cities. Some demonstrations have led to clashes with security forces.

No confirmed major security incidents at tournament venues as of DTG. However, Iran's IRGC strikes on Bahrain and Kuwait (June 27–28) add a new dimension to the threat picture for Iranian diaspora attending US host city venues. FBI and DHS maintain elevated counterterrorism posture across all 11 US host cities.

CRITICAL UPCOMING WINDOW: July 3–5 — Quarterfinals scheduled in Dallas, Kansas City, Houston, Philadelphia, and New York City. The convergence of Quarterfinal matches with the US 250th Independence Day celebrations creates the maximum threat window of the tournament. MAGNET operator guidance: recommend MAGCON L2 HIGH for host-city operators on July 3–5 match days.

CYBER / INFRASTRUCTURE KEV BULLETIN

PATCH-IMMEDIATELY TABLE

CVE / SYSTEM	SEVERITY	ACTION REQUIRED
CVE-2026-20230 Cisco Unified Communications Manager	CVSS 8.6 – CRITICAL (Cisco-rated)	NEW — KEV Deadline TODAY June 28. SSRF via WebDialer service allows unauthenticated file writes to OS → root escalation. Active exploitation confirmed by Defused (week of June 21). Patch available since June 3 (cisco-sa-cucm-ssrf-cXPnHcW). Disable WebDialer if patch unavailable. Treat internet-exposed Unified CM as compromised if unpatched.
CVE-2026-12569 PTC Windchill PDMlink / FlexPLM	CRITICAL – RCE	NEW — KEV Deadline TODAY June 28. Deserialization of untrusted data → unauthenticated RCE. Affects manufacturing, aerospace, automotive, defense PLM infrastructure. All versions through 11.0 and 11.1, 11.2, 12.0, 12.1, 13.0 branches affected. Apply PTC advisory CS473270 immediately.
CVE-2026-34908/34909/34910 Ubiquiti UniFi OS (x3)	CVSS 10.0 / 10.0 / 10.0 – CRITICAL	PASSED — Federal deadline 26 June. Three CVSS 10.0 vulnerabilities: command injection, improper access control, path traversal. CISA and NCSC Netherlands confirm active exploitation. Apply Ubiquiti Security Advisory 064. Treat unpatched as compromised; rotate all Ubiquiti network credentials.
CVE-2025-67038 Lantronix EDS5000	HIGH	PASSED — Federal deadline 26 June. Treat unpatched as compromised. Apply Lantronix advisory immediately.
CVE-2026-20253 Splunk Enterprise PostgreSQL Sidecar	CVSS 9.8 – CRITICAL	ONGOING — KEV Deadline PASSED 21 June. Pre-auth RCE. Public PoC on GitHub since June 13. Upgrade to 10.4.0, 10.2.4, or 10.0.7. Treat internet-exposed Splunk 10.0.x/10.2.x as compromised if unpatched.
CVE-2026-50751 Check Point Security Gateway	CVSS 9.3 – CRITICAL	ONGOING / ESCALATED — Qilin ransomware affiliate confirmed. Run SmartConsole log search from 2026-05-07. Apply hotfix. Disable IKEv1 if hotfix cannot be applied immediately.
CVE-2026-47281 Windows Defender/VSCode "RoguePlanet"	CVSS 9.6	ONGOING — Patch Tuesday 10 June. Zero-day, actively exploited. Apply June 2026 Microsoft patches.
CVE-2026-45657 Windows Kernel (RCE)	CVSS 9.8 – CRITICAL	ONGOING — Patch Tuesday 10 June. Zero-day, actively exploited. Use-after-free kernel RCE. Apply June 2026 Microsoft patches immediately.
CVE-2026-8398 DAEMON Tools Lite	CVSS 9.3	ONGOING — Federal deadline PASSED 17 June. Supply chain RCE. Update to v12.6.0.2445 or uninstall. Rotate all credentials. Treat unpatched as compromised.
CVE-2026-48027 Nx Console (VS Extension)	CVSS 9.3	ONGOING — Federal deadline PASSED 17 June. Malicious extension. Scan all developer workstations. Rotate credentials. Treat unpatched as compromised.
CVE-2026-42897 Microsoft Exchange Server	HIGH	ONGOING — XSS in OWA. Apply MSRC mitigations. Confirmed active exploitation.

Fortinet "FortiBleed" (multiple CVEs)	HIGH – CRITICAL	NEW INTELLIGENCE — 70,000+ Fortinet firewalls confirmed compromised. Not a formal CISA KEV but intelligence-confirmed mass exploitation. Patch all Fortinet products immediately; run IOC hunt; rotate all Fortinet VPN credentials.
cURL CVE-2026-8932 + 17 additional CVEs	HIGH	NEW — 18 vulnerabilities in cURL patched, including a 25-year-old flaw (CVE-2026-8932). Update to cURL 8.21.0 across all systems. 20 billion device install base warrants immediate enterprise-wide sweep.

EMERGING INDICATORS

- Watch: Hormuz — will Iran formally suspend the MOU? IRGC threatened "complete halt to all diplomatic processes" after June 27 CENTCOM strikes. Any formal Iranian MOU suspension announcement changes the strategic picture entirely.
- Watch: Cisco UCM CVE-2026-20230 — Deadline TODAY. All Unified CM deployments with WebDialer enabled are at risk. Check web logs for unexpected HTTP requests, unusual file creation activity, and anomalous process execution post-exploitation.
- Watch: PTC Windchill/FlexPLM CVE-2026-12569 — Deadline TODAY. Manufacturing, defense, and aerospace sectors using PLM must patch or mitigate immediately. Check for pre-patch compromise indicators in PLM deserialization event logs.
- Watch: Bahrain/Kuwait — follow-on Iranian strikes? First direct IRGC strikes on US-base host nations since MOU signing. Watch for escalation to direct US base targeting.
- Watch: Lebanon ceasefire holding? Hezbollah rejected the June 26 framework and fighting continued June 27–28. Any major IDF operation or Hezbollah escalation could trigger Iran to invoke MOU Clause 1 and formally suspend the agreement.
- Watch: Oil markets Monday open — exchange of strikes on Hormuz (Ever Lovely, Kiku) and Bahrain/Kuwait attacks will drive Brent price movement. Market signal will indicate assessment of MOU survivability.
- Watch: FIFA July 4th weekend (July 3–5) — Quarterfinals in Dallas, KC, Houston, Philadelphia, NYC. Maximum threat convergence with US 250th anniversary. Host-city MAGNET operators: recommend MAGCON L2 HIGH.
- Watch: Ubiquiti UniFi OS (3 × CVSS 10.0) — deadlines passed June 26 with confirmed active exploitation. Any organization operating unpatched Ubiquiti network infrastructure should assume compromise and begin incident response.
- Watch: Fortinet "FortiBleed" — 70,000+ confirmed compromised. Organizations running Fortinet firewalls/VPN should assume IOC check is urgent; credential rotation is now critical.
- Watch: Iran IAEA inspection dispute — no confirmed IAEA access to bombed nuclear sites. If Iran refuses inspections, it signals unwillingness to fulfill MOU nuclear provisions and may collapse the 60-day window.
- Watch: Delaney Hall court proceedings — NJ AG and Newark Mayor suits against GEO Group remain active. Watch for any court order restricting facility operations or compelling independent health inspections.
- Watch: Section 702 emergency session — SIGINT gap persists during active exchange of strikes with Iran. Watch for executive order or emergency Congress return.

VERIFIED STATUS

- ✓ **CONFIRMED** Iranian one-way attack drone struck M/V Ever Lovely (Singapore-flagged) on June 25 in Strait of Hormuz per CENTCOM statement and Trump Truth Social post. (CENTCOM, Fox News, NBC News — June 25–26, 2026)
- ✓ **CONFIRMED** US CENTCOM launched retaliatory strikes on Iranian military targets on June 26 and June 27, targeting missile/drone storage, radar sites, Qeshm Island, air defense sites, drone storage, and minelayer capabilities. (CENTCOM statement, CNN, RFE/RL — June 26–27, 2026)
- ✓ **CONFIRMED** Iranian drone struck M/T Kiku (Panama-flagged, QatarEnergy crude oil cargo) on June 27 at 4:30 a.m. ET; bridge damaged, crew safe. UKMTO confirmed. (CENTCOM, UKMTO, Times of Israel — June 27, 2026)
- ✓ **CONFIRMED** Iran's IRGC launched drone and missile attacks on Bahrain on June 27. Bahrain's Foreign Ministry condemned the attack. US reported no assets hit. (RFE/RL, NPR, Bahrain Foreign Ministry — June 27–28, 2026)
- ✓ **CONFIRMED** JMIC (US Navy) announced widened transit route near Oman on June 27 — documented challenge to Iran's routing authority. (Wikipedia Hormuz crisis — June 27, 2026)
- ✓ **CONFIRMED** US–Israel–Lebanon framework agreement signed June 26 by Secretary Rubio with Israeli and Lebanese ambassadors at State Department in Washington. (CNBC, Al Jazeera, Times of Israel — June 26, 2026)
- ✓ **CONFIRMED** Hezbollah leader Naim Qassem called the framework agreement "null and void" and rejected it June 26. Hezbollah supporters protested in Beirut. (Al Jazeera — June 26–27, 2026)

- ✓ **CONFIRMED** CVE-2026-20230 Cisco UCM SSRF added to CISA KEV June 25; BOD 26-04 deadline June 28 TODAY. Active exploitation confirmed by Defused. (CISA, Bleeping Computer, The Hacker News — June 25, 2026)
- ✓ **CONFIRMED** CVE-2026-12569 PTC Windchill/FlexPLM RCE added to CISA KEV June 25; BOD 26-04 deadline June 28 TODAY. (CISA, Security Boulevard — June 25, 2026)
- ✓ **CONFIRMED** Ubiquiti UniFi OS CVE-2026-34908/34909/34910 (3 × CVSS 10.0) and Lantronix EDS5000 CVE-2025-67038 — four BOD 26-04 deadlines passed June 26. Active exploitation confirmed by CISA and NCSC Netherlands. (CISA, threat-modeling.com — June 26, 2026)
- ✓ **CONFIRMED** Father's Day vigil outside Delaney Hall disrupted June 22: protester struck by vehicle; ICE deployed pepper spray. (Democracy Now! — June 22, 2026)
- ✓ **CONFIRMED** Georgian national Mamuka Artmeladze died at Winn Correctional Center Louisiana — 50th ICE custody death under Trump. (Democracy Now! — June 9, 2026)
- ✓ **CONFIRMED** GCC foreign ministers June 26 released statement declaring Iran deal must limit missile capability. (Wikipedia Iran-US negotiations — June 26, 2026)
- ✓ **CONFIRMED** US Senate passed war powers resolution rebuking Trump on Iran conflict — first successful passage during conflict. (hormuzstraitmonitor.com — June 2026)
- ✗ **NOT CONFIRMED** Hormuz fully open under MOU terms. Commercial transits ongoing under CENTCOM escort, but Iran contests routing and diplomacy is under severe strain as of DTG.
- ✗ **NOT CONFIRMED** Lebanon/Hezbollah ceasefire holding. Hezbollah rejected June 26 framework; fighting continued June 27–28.
- ✗ **NOT CONFIRMED** IAEA access to Iranian nuclear sites confirmed. US and Iran dispute whether Iran agreed to inspections.
- ✗ **NOT CONFIRMED** Iran–US MOU still fully operational. Iran's IRGC threatened "complete halt to all diplomatic processes" after June 27 CENTCOM strikes.
- ✗ **NOT CONFIRMED** GKN Garden Grove groundwater contamination confirmed. Testing ongoing.
- ✗ **NOT CONFIRMED** Converse Reservoir IED — suspect identified or motive confirmed. Investigation ongoing.

OPERATOR GUIDANCE

- **HORMUZ ACTIVE THREAT — COORDINATE WITH TRANSCOM (June 28):** Iranian drones struck two commercial vessels June 25–27. CENTCOM conducted retaliatory strikes. Iran struck Bahrain/Kuwait June 27–28. Commercial transits continue under CENTCOM escort but are actively threatened. DO NOT route commercial maritime through Hormuz without TRANSCOM coordination and current JMIC advisory. Use the widened Omani route per JMIC June 27 guidance — but verify Iran has not increased enforcement of its designated route restrictions.
- **CISCO UCM PATCH TODAY (CVE-2026-20230):** KEV deadline is TODAY June 28. Exploitation confirmed. Any Unified CM deployment with WebDialer enabled is at immediate risk. Apply cisco-sa-cucm-ssrf-cXPnHcW NOW. If patch unavailable, disable WebDialer immediately. Review web logs for unexpected HTTP requests, unusual file creation, and suspicious OS process activity since June 21. Assume compromise if internet-exposed and unpatched.
- **PTC WINDCHILL / FLEXPLM PATCH TODAY (CVE-2026-12569):** KEV deadline is TODAY June 28. Deserialization RCE in PLM software affecting manufacturing, aerospace, automotive, and defense sectors. Apply PTC advisory CS473270 immediately. Review PLM server deserialization event logs for pre-patch exploitation indicators. Restrict PLM network access pending patch.
- **UBIQUITI UNIFI OS — TREAT AS COMPROMISED (Deadlines PASSED June 26):** Three CVSS 10.0 vulnerabilities with confirmed active exploitation. Deadlines passed. Any unpatched Ubiquiti UniFi OS infrastructure: assume compromise. Apply Security Advisory 064. Rotate all administrative credentials, audit access logs from June 23 forward, review for unauthorized configuration changes.
- **FORTINET — URGENT IOC CHECK: NEW INTELLIGENCE:** 70,000+ Fortinet firewalls confirmed compromised. Not a formal CISA KEV but intelligence-confirmed mass exploitation. Patch all Fortinet products; run IOC hunt on Fortinet firewall/VPN logs; rotate all Fortinet VPN credentials and administrative accounts immediately.
- **FIFA WORLD CUP — HOST CITY OPERATORS (July 4 approaching):** Quarterfinals begin July 3. Recommend MAGCON L2 HIGH on July 4th weekend match days (July 3–5) in Dallas, KC, Houston, Philadelphia, NYC. Maintain EMS and comms redundancy. Avoid vehicle traffic in venue perimeters during match windows. Iran-themed geopolitical tensions (IRGC strikes on Bahrain/Kuwait) may heighten Iranian diaspora threat environment at US venues. Flashpoint threat landscape "dynamic" — recheck threat feeds daily.
- **BAHRAIN / KUWAIT — REGIONAL OPERATORS:** First direct IRGC strikes on US base host nations since MOU signing. NSA Bahrain and Ali Al Salem/AI Jaber Kuwait air bases in affected regions. Personnel in Bahrain and Kuwait: heighten force protection posture, review emergency procedures, monitor CENTCOM threat notifications closely.
- **DELANEY HALL / ICE FACILITIES — NJ/NORTHEAST OPERATORS:** 37+ day hunger/labor strike ongoing. Vehicle strike on protester June 22 escalated tensions. Legal proceedings active. Avoid Doremus Ave vicinity Newark

during protest windows. Monitor for spread to other ICE facilities. GAO-documented systemic issues at Camp East Montana signal a national pattern.

- **CHECK POINT VPN — FINAL CALL (CVE-2026-50751):** Qilin ransomware actor confirmed. Run SmartConsole log search from 2026-05-07 through June 2026 for IOCs (Kaupo Cloud HK, Shock Hosting, Vultr Holdings IPs). Apply emergency hotfix. Disable IKEv1 if hotfix cannot be applied immediately.
- **GENERAL:** Report cyber incidents to cisa.gov or IC3.gov; CI Fortify guidance at cisa.gov. Check magnetf.com/reports for any MAGNET S2 flash reports published since this snapshot.
