MAGNET S2

WEEKLY OSINT INTELLIGENCE SNAPSHOT

DTG: 260906-1800Z | Reporting Period: 30 August – 6 September 2026 | United States Focus

www.magnethf.com

MAGCON STATUS

MAGCON **LEVEL 3** ***ELEVATED***	MAGCON holds at Level 3 – ELEVATED per standing direction. Since the 260830-1800Z baseline, the Strait of Hormuz saw significant kinetic escalation: U.S. forces resumed airstrikes on Iranian targets near the strait on 1 Sep, and Iran struck 13 commercial vessels in August, most recently the tanker MT Sidr on 1 Sep, killing two seafarers. Iran separately stated on 7 Sep that an Oman-brokered agreement on a temporary safe shipping corridor is “days away,” though not yet finalized. Status: STRAIT OF HORMUZ REMAINS STABLE – PAUSED, NOT RESOLVED. Israel-Lebanon worsened this cycle: Israeli forces announced control of the Ali al-Taher Ridge and then widened strikes outside the declared security zone into the western Bekaa for the first time since June, with daily casualties reported 4–6 Sep. CISA added 10 new KEV entries across three batches (31 Aug, 2 Sep, 4 Sep), including a maximum-severity (CVSS 10.0) SonicWall SMA1000 SSRF chainable to remote code execution and a Kestra OSS command-injection flaw under active exploitation for reverse shells and cryptomining. A new MAGNET S2 standalone report (260831-2200Z), assessing foreign state-linked threats to U.S. bulk-power equipment under EO 14420, is incorporated this cycle. The A/I Collective SDGT designation reported last cycle has concluded: the collective announced a full, permanent shutdown of its services on 6 Sep, 11 days after designation. Congress passed a continuing resolution funding the federal government through 11 Dec, averting a shutdown ahead of the midterms. Delaney Hall, Section 702/FISA, and America 250 show no material change this cycle.

TREND VS LAST WEEK: STABLE – HORMUZ PAUSED NOT RESOLVED (KINETIC ESCALATION) / LEBANON WORSENING / A/I COLLECTIVE RESOLVED (SHUTDOWN) / CISA KEV WORSENING / GOVT SHUTDOWN RISK IMPROVED / NO CHANGE (DELANEY HALL, SECTION 702, AMERICA 250)

PRIMARY RISK DRIVERS

- **PAUSED, NOT RESOLVED — Strait of Hormuz/Iran:** U.S. forces resumed airstrikes on Iranian targets near the strait 1 Sep; Iran struck 13 commercial vessels in August, most recently the tanker MT Sidr (1 Sep), killing two seafarers. Iran states an Oman-brokered temporary safe-corridor deal is “days away” (7 Sep) but not yet signed.
- **WORSENING — Israel-Lebanon:** IDF announced control of the Ali al-Taher Ridge, then widened strikes into the western Bekaa for the first time since June; daily casualties reported 4–6 Sep despite the nominal Rome-track ceasefire.

- **RESOLVED — A/I Collective SDGT Designation:** Follow-on to 260828-0400Z — A/I's banking access was suspended 1 Sep, its Noblogs platform was compromised/defaced, and the collective announced a full, permanent shutdown of all services on 6 Sep, 11 days after the SDGT designation.
- **WORSENING — CISA KEV:** Three batches (31 Aug, 2 Sep, 4 Sep) added 10 CVEs, including a maximum-severity (CVSS 10.0) SonicWall SMA1000 SSRF chainable to RCE and a Kestra OSS command-injection flaw under active exploitation.
- **IMPROVED — Government Funding/Continuity:** House passed a continuing resolution (370-48) 1 Sep funding the government through 11 Dec, averting a shutdown ahead of the midterm elections.
- **NEW — EO 14420 Bulk-Power Threat Assessment:** MAGNET S2 260831-2200Z incorporated: foreign state-linked (China/Russia) threats to U.S. bulk-power equipment; MAGCON impact assessed as no change; DOE implementing rules due ~24 Dec 2026 is the standing collection priority.
- **NO CHANGE — Delaney Hall, Section 702/FISA, America 250:** No material change since the 260830-1800Z baseline.

DELTA SUMMARY — CHANGES FROM LAST REPORT (260830-1800Z)

TOPIC	DELTA FROM 260830-1800Z / STATUS
Strait of Hormuz / Iran War – Status	PAUSED, NOT RESOLVED (kinetic escalation) — U.S. resumed airstrikes 1 Sep; Iran struck 13 vessels in August incl. MT Sidr (2 killed, 1 Sep). Iran-Oman safe-corridor deal said “days away” 7 Sep, not yet signed.
Bab el-Mandeb / Red Sea	NO CHANGE — Holds at CRITICAL following the 12 Aug Tihamah strike; no new incident identified this window.
Israel–Lebanon	WORSENING — IDF took Ali al-Taher Ridge, widened strikes into western Bekaa (first since June); casualties reported daily 4–6 Sep.
CISA KEV Catalog	WORSENING — 10 new CVEs across three batches (31 Aug, 2 Sep, 4 Sep), incl. SonicWall SMA1000 SSRF (CVSS 10.0, chainable to RCE) and actively-exploited Kestra OSS command injection.
A/I Collective / SDGT Follow-On	RESOLVED — A/I Collective announced full, permanent shutdown 6 Sep, 11 days after the 26 Aug SDGT designation; banking suspended 1 Sep, Noblogs compromised/defaced.
EO 14420 Bulk-Power Threat (New Intel Report)	NEW — MAGNET S2 260831-2200Z incorporated: foreign state-linked (China Volt Typhoon, Russia Sandworm/APT44) threats to U.S. bulk-power equipment; DOE implementing rules due ~24 Dec 2026.

Government Funding / Continuity	IMPROVED — CR passed 1 Sep (370-48), funds government through 11 Dec; shutdown risk removed ahead of midterms.
PJM Grid Reliability	NO CHANGE (transient) — Hot-weather Max Generation/Load Management alerts and a DOE 202(c) order were active 1–8 Sep; no customer-facing curtailment reported; assessed as weather-driven, not structural.
Delaney Hall	NO CHANGE — No new incident this window.
Section 702 / FISA	NO CHANGE — No new legislative action this window.
America 250	NO CHANGE — No reinstatement trigger identified; still pending operator direction.

NO CHANGE

- **NO CHANGE —** Section 702 / FISA: No new legislative action this window; surveillance continues under RISAA's post-sunset provisions per prior reporting.
- **NO CHANGE —** America 250: No reinstatement trigger identified; still pending operator direction.
- **NO CHANGE —** Delaney Hall: No new incident this window; ICE facility oversight and litigation tracks continue without new developments.
- **NO CHANGE —** Bab el-Mandeb / Red Sea: Holds at CRITICAL following the 12 Aug Tihamah strike; no new incident identified this window.
- **NO CHANGE —** Panama Canal: Remains ROUTINE; normal operations.

SECTOR THREAT LEVELS

SECTOR	LEVEL	NOTES
Terrorism / Extremism	**ELEVATED**	Follow-on to the 26 Aug SDGT designation of A/I Collective: the group's full shutdown (6 Sep) closes this specific thread, but the standing pattern of material-support actions against decentralized-movement digital infrastructure providers persists.
Cyber / Infrastructure	**ELEVATED**	10 new CISA KEV entries this cycle (31 Aug, 2 Sep, 4 Sep) including a maximum-severity (CVSS 10.0) SonicWall SMA1000 SSRF and an actively-exploited Kestra OSS command-injection flaw; EO 14420 bulk-power threat report incorporated.
Energy / Economic	**HIGH**	Hormuz kinetic escalation (U.S. airstrikes 1 Sep, 13 vessels struck in August, 2 seafarers killed) offsets Iran-Oman corridor-talk movement; Bab el-Mandeb remains CRITICAL.

Civil Unrest	**ELEVATED**	A/I Collective shutdown reinforces standing coverage of decentralized-movement network disruption; no new MAGCON-level trigger identified this cycle.
Transportation / Mass Gatherings	**ELEVATED**	Hormuz/Lebanon chokepoint and conflict risk remains elevated for maritime and regional transit; GSX 2026 (Atlanta, 14–16 Sep) is a non-threat industry watch item next cycle.
Public Health / Environmental	**ELEVATED**	Carried forward at prior assessment; no fresh reporting collected this cycle pending next OSINT sweep.
Border / Immigration	**HEIGHTENED**	Delaney Hall oversight and litigation tracks continue with no new incident this cycle; carried forward at prior assessment.
Domestic Political / Continuity	**HEIGHTENED**	Government shutdown risk removed via CR through 11 Dec, a stabilizing factor; baseline elevated political-violence trend persists nationally.
Grid / Utilities	**ELEVATED**	PJM hot-weather Max Generation alerts and a DOE 202(c) emergency order were active 1–8 Sep (weather-driven, not structural); EO 14420 bulk-power equipment threat report incorporated as a standing collection priority.

GLOBAL CHOKEPOINT WATCH

CHOKEPOINT	STATUS	ASSESSMENT
Strait of Hormuz	**CRITICAL**	U.S. forces resumed airstrikes on Iranian targets 1 Sep; Iran struck 13 commercial vessels in August, most recently the tanker MT Sidr (1 Sep, 2 seafarers killed). Iran states an Oman-brokered temporary safe-corridor deal is “days away” (7 Sep) but not signed. TREAT AS STABLE, PAUSED, NOT RESOLVED — never improving while attacks on commercial shipping continue.
Bab el-Mandeb / Red Sea	**CRITICAL**	Holds at CRITICAL following the 12 Aug Houthi missile strike on the Tihamah near Perim Island (6 killed). No new incident identified this window; treat as active lethal risk, not de-escalation.
Panama Canal	**ROUTINE**	Stable. Normal operations; no reporting of disruption this cycle.
Strait of Malacca	**ELEVATED**	No new significant reporting this cycle; carried forward pending fresh OSINT sweep next cycle.

KEY INCIDENTS

STRAIT OF HORMUZ — U.S. RESUMES AIRSTRIKES, TANKER WAR INTENSIFIES (1–6 SEPTEMBER)

U.S. Central Command announced on 1 Sep that U.S. forces struck a number of Iranian targets along the Strait of Hormuz, including two unidentified vessels, resuming an aerial campaign after a period of relative pause. Iran struck at least 13 commercial vessels in August, the most recent a Monday attack on the crude oil tanker MT Sidr (IMO: 9854715), which left two seafarers dead. Iranian parliamentary spokesman Hassan Ghashghavi characterized the ongoing exchange as “an existential war with America,” rejecting the legitimacy of the U.S. naval blockade. Treasury Secretary Scott Bessent has touted daily oil throughput figures (10–17 million barrels), but maritime analysts caution that transit data lags roughly a week because many vessels switch off AIS for the passage, and appetite for the transit risk could fall sharply if further seafarer deaths or vessel losses occur. Separately, on 7 Sep Iran's Foreign Ministry spokesman said a deal with Oman on a temporary safe shipping route through the strait is in its final stages and “days away.” Per standing MAGNET S2 convention, and consistent with the kinetic activity above, the strait is assessed as STABLE — PAUSED, NOT RESOLVED; diplomatic movement on a safe-corridor MOU does not equate to a reduction in operational risk to commercial shipping while U.S.-Iran strikes continue.

ISRAEL–LEBANON — IDF TAKES ALI AL-TAHER RIDGE, WIDENS STRIKES INTO WESTERN BEKAA

The Israeli military announced it had cleared Hezbollah fighters from the strategic Ali al-Taher Ridge, then launched an overnight bombing campaign outside its declared security zone on 5 Sep that killed five people and wounded 24 across five locations in southern Lebanon and, for the first time since June, in the western Bekaa. Strikes continued through the weekend: four killed and 20 wounded in Nabatieh, Arab Salim, Nabatieh al-Fawqa, and Kfar Reman on 6 Sep, with the IDF citing retaliation for an attempted Hezbollah drone strike on its soldiers in the occupied buffer zone. A separate 4 Sep strike on Kfar Reman killed three and injured at least 23. Despite the U.S.-brokered June ceasefire, Israeli forces continue to operate inside a self-declared southern Lebanon security zone, and the pace of strikes and casualties has intensified materially since the 260830-1800Z baseline.

A/I COLLECTIVE — FULL SHUTDOWN FOLLOWING SDGT DESIGNATION

Follow-on to MAGNET S2 260828-0400Z: the Italian digital-infrastructure collective Autistici/Inventati (A/I), designated a Specially Designated Global Terrorist entity by OFAC on 26 Aug, announced on 6 Sep that it would permanently shut down all services — 11 days after designation. Banca Etica suspended A/I's bank account on 1 Sep as a precaution against secondary sanctioning; A/I's Noblogs blogging platform was separately compromised and defaced after an attacker exploited a software vulnerability to gain privileged access. A/I stated that continuing to provide services had become incompatible with protecting its users given the sanction's effect on international banking, domain, and financial-system access. Decentralized-movement and anarchist-adjacent online communities are actively discussing migration to alternative infrastructure providers; MAGNET S2 will monitor for signs the SDGT-designation approach is applied to additional providers (see Emerging Indicators).

NEW INTELLIGENCE REPORT — EO 14420 BULK-POWER THREAT ASSESSMENT

MAGNET S2 published a standalone intelligence report (DTG 260831-2200Z) assessing the open-source record underlying Executive Order 14420, signed 26 Aug, which declared a national emergency over foreign-produced bulk-power system equipment. The report finds the order formalizes a multi-year, previously documented policy concern (Volt Typhoon utility-level OT access, undocumented communications hardware in some Chinese-made inverters, and a Russian Sandworm/APT44 campaign against Western energy-sector edge devices) rather than responding to a new incident; no open-source reporting reviewed documents a confirmed compromise of U.S. bulk-transmission grid control systems by any foreign actor to date. DOE implementing rules are due by ~24 Dec 2026 and are the actionable trigger for procurement decisions. Full report at magnethf.com/260831-2200z.

GOVERNMENT FUNDING — SHUTDOWN AVERTED AHEAD OF MIDTERMS

The House passed a continuing resolution 370-48 on 1 Sep funding the federal government through 11 Dec, clearing the Senate and heading to the President's desk. The measure removes shutdown risk ahead of the 30 Sep fiscal-year-end deadline and the November midterm elections, and includes provisions temporarily blocking a proposed OMB rule subjecting federal grant funding to political-appointee review and restricting fund transfers to Border Patrol from other programs.

CYBER / INFRASTRUCTURE KEV BULLETIN

CVE	VULNERABILITY	SEVERITY	NOTES
CVE-2026-81578	PaperCut NG/MF Missing Authentication for Critical Function	**CRITICAL**	Added 31 Aug. Missing auth on critical function; chainable with CVE-2026-82078. CISA due 14 Sep.
CVE-2026-82078	PaperCut NG/MF Unsafe Reflection Vulnerability	**HIGH**	Added 31 Aug. Chainable with the missing-auth flaw above. CISA due 14 Sep.
CVE-2026-9586	Sangoma Switchvox SQL Injection	**HIGH**	Added 2 Sep. Apply vendor patch immediately.
CVE-2026-48710	Kludex Starlette HTTP Request/Response Smuggling	**HIGH**	Added 2 Sep. Apply vendor patch immediately.
CVE-2026-49869	Kestra OSS OS Command Injection	**CRITICAL**	Added 2 Sep. Actively exploited per Microsoft — reverse shell, Docker environment discovery, cryptominer deployment, and workflow-task data harvesting observed. Patch immediately.
CVE-2026-59822	BerriAI LiteLLM Improper Authentication	**HIGH**	Added 2 Sep. Apply vendor patch immediately.
CVE-2026-82329	JFrog Artifactory Improper Authentication	**HIGH**	Added 2 Sep. Apply vendor patch immediately.
CVE-2026-83548	SonicWall SMA1000 Server-Side Request Forgery	**CRITICAL**	Added 2 Sep. CVSS 10.0, pre-authentication SSRF; chainable with CVE-2026-83549 for unauthenticated RCE. CISA due date already passed (5 Sep) — patch immediately.
CVE-2026-83549	SonicWall SMA1000 OS Command Injection	**CRITICAL**	Added 2 Sep. Post-auth command injection; chains with the SSRF above for full remote code execution. Patch immediately.
CVE-2026-85046	Google Chromium V8 Type Confusion	**CRITICAL**	Added 4 Sep. Affects Chromium-based browsers (Chrome, Edge, Opera).

			Update immediately.

EMERGING INDICATORS

- **WATCH — Hormuz Corridor Finalization:** Whether the Iran-Oman temporary safe-corridor deal, described 7 Sep as “days away,” is formally signed and implemented, and whether it affects the kinetic tempo of U.S.-Iran strikes.
- **WATCH — Hormuz Casualty/Escalation Trajectory:** Whether further seafarer deaths or vessel losses in the tanker war reduce shipping-industry risk appetite for transit, per maritime-analyst commentary this cycle.
- **WATCH — Israel-Lebanon Ridge Dispute:** Whether the widened strikes into the western Bekaa represent a durable expansion of the conflict zone or a temporary retaliatory episode.
- **WATCH — SDGT Designation Precedent:** Whether additional decentralized-movement digital-infrastructure providers face similar SDGT-style designations following the A/I Collective precedent and shutdown.
- **WATCH — EO 14420 DOE Rulemaking:** Track DOE's implementing regulations, due ~24 Dec 2026, as the first point at which specific vendors/products may be named as Covered Foreign Entities.
- **WATCH — wp2shell Re-Verification:** Continue periodic confirmation that magnethf.com's WordPress Core patch level (7.1) remains post-dating fixed releases 6.9.5/7.0.2.
- **WATCH — America 250 Reinstatement:** Operator direction still pending on watch-item reinstatement; no new triggering activity identified this cycle.
- **WATCH — GSX 2026:** Atlanta, 14–16 Sep — major physical-security industry gathering; non-threat watch item, noted for situational awareness only.

VERIFIED STATUS

✓ **CONFIRMED** U.S. resumed airstrikes on Iranian targets near the Strait of Hormuz (1 Sep). (USNI News, CENTCOM social media — 4 Sep 2026)

✓ **CONFIRMED** Tanker MT Sidr struck, two seafarers killed (1 Sep). (USNI News citing Iranian strikes on 13 vessels in August — 4 Sep 2026)

✓ **CONFIRMED** Israeli control of Ali al-Taher Ridge and widened strikes into western Bekaa (4–6 Sep). (The National, Al Jazeera, Reuters/US News — 4–6 Sep 2026)

✓ **CONFIRMED** A/I Collective full, permanent shutdown of services (6 Sep). (A/I's own statement, cited by Wikipedia and anarchist-media aggregators — 6 Sep 2026)

✓ **CONFIRMED** House passage of continuing resolution funding government through 11 Dec (1 Sep). (CNN, Nextgov/FCW — 1 Sep 2026)

✓ **CONFIRMED** PJM DOE 202(c) emergency order and hot-weather Max Generation alerts (1–3 Sep, effective through 8 Sep). (PJM Inside Lines official updates — 1–2 Sep 2026)

✓ **CONFIRMED** CISA KEV additions, 31 Aug / 2 Sep / 4 Sep batches (10 CVEs total). (CISA.gov official KEV catalog alerts)

✗ **NOT CONFIRMED** Whether the 7 Sep Iran-Oman “days away” safe-corridor statement will be formally signed and implemented. (Bloomberg reports negotiations in “final stages”; not yet executed as of DTG.)

✗ **NOT CONFIRMED** Independent, non-Iranian attribution for the full pattern of August tanker attacks beyond IRGC/Iranian claims and U.S. characterizations. (Reporting relies primarily on Iranian, U.S., and industry (Windward MIOC) sources; no third-party forensic attribution reviewed this cycle.)

OPERATOR GUIDANCE

Maritime / Shipping:

- Continue avoiding Strait of Hormuz transit without current TRANSCOM/JMIC guidance; do not treat the 7 Sep Iran-Oman corridor statement as reducing operational risk — U.S. airstrikes and Iranian vessel attacks continued through the reporting window.

Cyber:

- Patch SonicWall SMA1000 appliances immediately — CVE-2026-83548 (CVSS 10.0) is chainable with CVE-2026-83549 for unauthenticated remote code execution; CISA's federal remediation deadline has already passed.
- Patch Kestra OSS immediately — CVE-2026-49869 is under active exploitation for reverse shells, container discovery, and cryptomining per Microsoft reporting.
- Patch PaperCut NG/MF and update all Chromium-based browsers (Chrome, Edge, Opera) against CVE-2026-85046.
- Continue periodic re-verification of magnethf.com's WordPress Core version against the wp2shell CVEs.

Diplomatic Tracking:

- Monitor the Iran-Oman safe-corridor negotiation for signature/implementation as the key indicator for any Hormuz status-language change next cycle.
- Treat the western Bekaa strikes as the key indicator for whether the Israel-Lebanon conflict zone is durably expanding beyond the prior security-zone boundary.

General:

- Provide direction on America 250 watch-item reinstatement — still pending operator call as of this cycle.
- No change to standing guidance for Delaney Hall or Section 702 at this time.
- Track DOE's EO 14420 rulemaking (due ~24 Dec 2026) as a standing S2 collection priority for stations supporting utility, cooperative, or municipal power infrastructure.
- Report cyber incidents to cisa.gov or IC3.gov; CI Fortify guidance at cisa.gov.
